

REU Computational Materials Chemistry, Summer 2004

Name: _____

email address: _____

Home Address: _____

Attending the following college or university in the fall: _____

When the Fall 2004 academic semester starts I will be a Sophomore, Junior, or Senior (please circle one).

Tell us about your plans for a career, job or graduate school when you graduate:

Working this summer with ISU Professor: _____

Title of your project: _____

Brief description of your project:

Did you have adequate interactions with the ISU professor you are working with this summer?

Did you have adequate interactions with the ISU graduate students/undergraduate students in the research group you are working with this summer?

Did you have an adequate background to undertake the project?

Do you think you will continue your project during the Fall 2004 and or Spring 2005 semesters at your college or university?

Did your research experience at ISU help you to be (more, less, or the same) interested in pursuing a career in chemistry?

How have your accommodations (lodging and food) been? Any improvements?

Please tell us what we did that worked and what we can do to improve the undergraduate research experience?
